

FULL HEIGHT, SAVE SPACE

With its small footprint, optimal lifting height, speedy lifting times and incredible safety features to guarantee your protection, the GP-7 is a clear-cut revolution in engineering. It all starts with the design. The super-slim car lift columns are capable of lifting up to 7,000 lbs. with incredible ease. In fact, vehicles will reach a max lifting height of 78" twice as fast as other lifts. This is possible thanks to a hydraulic cylinder that runs through the overhead crossbar, which acts in tandem with dual aircraft lifting cables to provide lifting force from two sources. For every inch of cylinder extension, the lift carriage rises 2 inches. The obvious benefit of this is reduced downtime and faster turnaround. We don't have to tell you that means higher profits and happier techs.

FEATURES

- Single hidden overhead cylinder
- Low-Pro™ arms for sports cars
- Automatic safety locks
- Redundant safety cables
- 5-Year Warranty
