

ULTIMATE LOW-CEILING LIFT

The game-changing upside of the GP-7LCS is that it stands at just 8' 10". Even if it doesn't offer as much rise as high as other two-post lifts, its impressive 58" lifting height is still more than what you get with low-profile, mid-rise scissor lifts. So, if you're between a scissor lift and a GrandPrix, the GP-7LCS ultimately offers more lifting height.

It's hard to overstate how different the GP-7LCS is from any other garage lift. Two-post lifts have long been standard equipment for professional service bays, but many DIY'ers have been waiting for the day a model would come along that fits in an average-size garage. GrandPrix comes with the same great industry-best warranty as other BendPak two-posts lifts.

FEATURES

- Single hidden overhead cylinder
- Low-Pro™ arms for sports cars
- Taller lift carriages
- Automatic safety locks
- Redundant safety cables
- Multiple lock positions
- 5-Year Warranty
