Steel Construction**

Metal Saddle

Protected Handle Design

**High-Strength Steel Construction**  
provides strength and durability

**Swivel Casters**  
for easy mobility

### Lightweight Design for Ease-Of-Use

The RFJ-3TP is a versatile lifting machine designed to meet a variety of everyday duties. Capable of handling a full 6,000-lb. load, this trusty floor jack is made out of heavy-gauge steel to ensure maximum durability under tremendous pressure. As with every Ranger floor jack, the RFJ-3TP exceeds all ANSI standards in performance and safety.

This jack is designed to handle most residential vehicles, including light trucks and SUVs. With a 5.25" in collapsed profile, this isn't one of our super-low-profile models, but it is ideal for average sedan heights and heavier-duty vehicle types. It's also exceptional lightweight, so you get an incredible power-to-weight ratio that surely explains why this floor jack is a staple in garages worldwide.

### Features

- Alloy-plated ram
- Swivel casters for easy mobility
- Built-in safety overload system
- Welded lift arm assembly
- Heavy steel construction
- Sealed hydraulics prevents contamination
- Double-sealed hydraulics prevents contamination and extends life
